Kimtech™ Blue Nitrile Gloves

Kimtech™ Blue Nitrile Ambidextrous Gloves provide excellent tactile sensitivity and superb grip in wet and dry environments. The latex-, silicone- and powder-free gloves are engineered for a comfortable, skin-friendly fit and extended use.

- Assured Compliance: PPE Cat III according to Regulation (EU) 2016/425, - EN ISO 374-1:2016 Type C (K) Chemical Splash protection,- EN 374-4:2003 Resistance to degradation by chemicals,- EN ISO 374-5:2016 Micro Organism and VIRUS Protection
- A smooth bisque finish enhances grip and tactile sensitivity for safer and more efficient processes in wet or dry conditions.
- Beaded cuffs add strength to the gloves, reducing the risk of tearing and increasing their durability, while also reducing roll down for easier donning and doffing.
- Contain no natural rubber latex, silicone or powder, reducing the risks of skin irritation for the wearer.
- Available in a wide range of sizes, from S to XL.

Kimtech™ Blue Nitrile Ambidextrous Gloves deliver high levels of compliant, non-sterile process security, for seamless protection when and where it is needed. The gloves feature a smooth finish and are suitable for daily use. The synthetic nitrile (Acrylonitrile Butadiene) polymer material is designed for fit and reliability, with a smooth bisque finish for excellent grip in both wet and dry conditions. The gloves are ambidextrous and incorporate a beaded cuff for added strength and ease of donning, so the wearer can simply grab and go without any fear of ripping the material. Our non-sterile blue nitrile lab gloves are also anti-static tested to ensure no disruption to samples or equipment and are silicone- and powder-free. Manufactured from nitrile instead of rubber latex, the gloves also feature reduced likelihood of TYPE I glove-associated reactions and are specifically designed to maximise comfort, even during extended use. With excellent protection against viruses and suitable for a wide variety of non-sterile applications, Kimtech™ Blue Nitrile gloves are designed to protect your processes through minimising contamination risk and boosting productivity. Available in sizes from S to XL and conforming to several industry testing and safety standards. Available Sizes/Codes: S - 97982M - 97983L - 97984XL - 97985

Kimtech™ G3 Latex Gloves

Kimtech™ G3 Latex cleanroom gloves provide sensitive and dextrous protection in ISO Class 3 or higher cleanrooms. The gloves have excellent cleanliness and feature a textured finish for enhanced tactile performance.

Assured Compliance:- PPE Cat III according to Regulation (EU) 2016/425, - EN ISO 374-1:2016 Type C (K) Chemical Splash protection,- EN 374-4:2003 Resistance to degradation by chemicals,- EN ISO 374-5:2016 Micro Organism and VIRUS Protection-Certificate of Analysis available online

- High quality latex material provides high levels of contamination protection against micro-organisms, chemical splash, particles and extractables.
- Suitable for use in ISO Class 3 or higher cleanrooms, and provided with supporting technical information to demonstrate regulatory compliance.
- Gloves are non-sterile, ambidextrous, disposable and a natural colour.
- Textured palm and fingertips enhance grip and tactile sensitivity for safer and more efficient processes.
- Beaded cuffs add strength to the gloves, reducing the risk of tearing and increasing their durability, while also reducing roll down for easier donning and doffing.
- Made from natural rubber latex washed repeatedly in ultrapure deionised water and containing no powder, reducing the risks of skin irritation for the wearer.
- Available in a range of sizes, from small to extra-large.

Kimtech™ G3 Latex Ambidextrous cleanroom gloves provide enhanced tactile sensitivity and performance, combined with high contamination control, for seamless protection when and where it counts. During manufacture the natural rubber latex gloves are washed repeatedly in ultrapure deionised water to ensure consistent control of particles and extractables. Gloves are then double-bagged with polyethylene materials and case liner to maintain cleanliness. Kimtech™ G3 Latex cleanroom gloves are non-sterile and are recommended for ISO Class 3, or higher, cleanroom environments, providing enhanced wearer protection and handling performance for even the most challenging applications. A high-quality finish, with texturing on the palm and fingertips, provides improved grip, tactile sensitivity and comfort in both wet and dry conditions. In addition, the powder-free construction minimises contamination and drying effects on the wearer's skin, ensuring that cleanroom users are protected as much as their applications and equipment. The disposable gloves also feature beaded cuffs for easy donning, and better seal formation with other garments. Rigorous product development and testing, combined with proven manufacturing processes, results in latex cleanroom gloves that satisfy many regulatory compliance requirements, and the gloves are provided with all relevant supporting technical information. Available Sizes / Codes: S - HC225M - HC335L - HC445XL - HC555

Kimtech™ Opal™ Nitrile Gloves

Kimtech™ Opal™ Nitrile Gloves guard against contamination by chemical splash and micro-organism hazards. Powder free, ambidextrous with beaded cuff and textured fingertips. The absence of natural rubber latex and vulcanizing agents reduces the risk of TYPE I and IV glove-associated skin reactions.

- Assured Compliance:- Category III PPE product certified according to the Regulation (EU) 2016/425 and to the Regulation (EU) 2016/425 as brought in the UK law and amended, - EN ISO 374-1 Type B (KPT) Chemical Splash protection,- EN 374-4 Resistance to degradation by chemicals,- EN ISO 374-5 Micro Organism and VIRUS Protection
- Formulated without Thiurams, Thiazoles, Guanidines, Carbamates and no sulphur added
- Soft, comfortable and easy to don
- Textured fingertips enhance grip and tactile sensitivity for safer and more efficient processes
- Dark color that enhance concentration on task
- Available in a wide range of sizes, from XS to XL

Kimtech™ Opal™ nitrile gloves guard against contamination by chemical splash and micro-organism hazards, delivering seamless protection when and where it counts. The powder-free gloves are ideal for use in research and production facilities, life sciences and non-sterile drug manufacturing applications. The gloves feature an innovative approach using a thin nitrile polymer with a tip thickness of just 0.07mm, but with excellent tensile strength suitable for rigorous process use. Easy to don, soft and comfortable Kimtech™ Opal™ nitrile gloves are suitable for extended wearing time. The absence of natural rubber latex, sulphur and vulcanizing agents* reduces the risk of TYPE I and TYPE IV glove-associated skin reactions, protecting the wearer as well as the application. Precision manufacturing reduces the risk of contamination and ensures the nitrile gloves offer high levels of regulatory compliance. Beaded cuffs and textured fingertips enable excellent handling of both wet and dry materials, and the ambidextrous gloves have been extensively tested under stringent conditions. In addition, the thin nitrile construction and efficient packaging mean that the chemical-resistant gloves can reduce waste by up to 50%. Available Sizes/Codes: XS/62880 - S/62881 - M/62883 - L/62883 - XL/62884.

Data sheet

Kimtech™ PFE Latex Gloves

Kimtech™ PFE Latex Ambidextrous Gloves provide comfortable, skin-friendly and ISO-compliant contamination protection. The non-sterile PFE latex gloves also feature a textured finish and beaded cuff to add strength and simplify donning.

- Assured Compliance:- PPE Cat III according to Regulation (EU) 2016/425, - EN ISO 374-1:2016 Type C (K) Chemical Splash protection,- EN 374-4:2003 Resistance to degradation by chemicals,- EN ISO 374-5:2016 Micro Organism and VIRUS Protection
- Superb quality PFE-latex material provides high levels of contamination protection against micro-organisms, chemical splash, viruses and more.
- Suitable for use in a range of laboratories environments and provided with supporting technical information to demonstrate regulatory compliance.
- Gloves are non-sterile, ambidextrous, disposable and a natural colour.
- Textured palm and fingertips enhance grip and tactile sensitivity for safer and more efficient processes.
- Beaded cuffs add strength to the gloves, reducing the risk of tearing and increasing their durability, while also reducing roll down for easier donning and doffing.
- Made from natural rubber latex for a low dermatitis risk and containing no powder, reducing the risks of skin irritation for the wearer.
- Available in a range of sizes, from XS to XL.

Made of skin-friendly PFE-latex, Kimtech™ PFE Latex Ambidextrous Gloves are suitable for a range of applications in laboratories, testing and manufacturing environments. Provides enhanced tactile sensitivity and performance, combined with high contamination control, for seamless protection when and where it counts. Our ambidextrous PFE Latex gloves are manufactured from natural rubber latex which decreases chances of dermatitis. The gloves are tested to ensure protection against an array of contaminants including viruses and chemical splash, and feature a protein level of 50 µg/g. A high-quality finish, with texturing on the palm and fingertips, provides improved grip, tactile sensitivity and comfort in both wet and dry conditions. In addition, the powder-free construction minimises contamination and drying effects on the wearer's skin, ensuring users are protected as much as their applications and equipment. The non-sterile and disposable gloves also feature beaded cuffs for easy donning, and better seal formation with other garments. Available Sizes/Codes: XS - E110; S - E220; M - E330; L - E440; XL - E550

Ansell Micro-Touch Micro-Thin Nitril

This non-sterile glove is manufactured with a thinner formulation to provide excellent tactile sensitivity and dexterity as well as exceptional comfort, fit and feel. The high quality finish ensures that this glove is suitable for a wide range of clinical procedures.

Main features and benefits

- Excellent tactile sensitivity is ideal for palpating veins and applying infusions
- The textured surface of the glove promotes safe handling of materials and instruments
- 300 gloves per box

Primary industries

- Healthcare

Packing

- 300 gloves per box
- 10 pieces per carton
- 3000 gloves per carton

Standards and certifications

- ASTM D6319
- Kategorie III; EN 420:2003 A1:2009
- EN 455 1-4; EN 455 1-4
- FDA21 CFR 177-2600-US Food Contact Approved
- ISO 10993-10:2002;

Recommended for

- Improved tactile sensitivity and dexterity, especially during delicate procedures
- Protection against type I latex allergies in medical staff and patients
- Short, low-risk examination procedures
- Environmentally friendly facilities

Declaration of Compliance

Hartalega Coats Nitrile Gloves

Colloidal Oatmeal Coated Nitrile Exam Gloves COATS® (an acronym for Colloidal Oatmeal System) is a patented and unique nitrile glove technology. COATS® utilizes the powerful benefits of all-natural oats, an FDA-recognised skin protectant, as a coating that forms a natural, moisturizing barrier between the glove and skin. This acts as a preventative measure against skin irritation and eliminates uncomfortable and irritating conditions experienced when wearing normal gloves. Users who suffer from dry and itchy skin due to frequent hand washing and glove usage can now rely on COATS® to soothe and nurture the skin and protect their hands while they work.

Regulatory Compliance

FDA 510(k), MDD 93/42/EEC, REACH, ROHS Directive 2002/95/EC, EC 10/2011, EC 1935/2004, PPE 89/686/EEC

Standards

ASTM D6319, ASTM 6978, EN455 part 1, 2, 3 & 4, EN 1186, EN 13130, CEN/TS 14234, EN 420, EN 374 part 1, 2 & 3

Classification

Class I (FDA), Class I (MDD 93/42/EEC), Category 3 (BfR XXI), Category III (PPE 89/686/EEC)

Patent

7,691,436; 7,718,240; 7,740,622; 8,075,965; 8,458,818

Application Settings

Low risk - medical, dental, procedures, chemotherapy drugs, pathology lab and food handling. Coated with FDA recognised skin protectant. Clinically proven to help protect and moisturise your skin from dry and irritated skin from prolonged glove use and hand wash.

Rosenberg - Nitrile gloves

Rosenberg -Nitrile Gloves

Description:

Sturdy, tear-resistant disposable nitrile gloves for professional use. Disposable use as medical disposable gloves, chemicals protection gloves, food and restaurants, cosmetics.

Layer thickness: 5 mil. approx. 0.13 mm, which is stronger than many other nitrile gloves (approx. 0.09 mm), therefore more tear resistant. For thinner gloves, 2 pieces are often put on one above the other in practice (double consumption = double costs), which is not necessary with Rosenberg.

- Reinforced at fingertips and cuff for improved grip and higher stability (do not tear as quickly).
- Nitrile, free of natural latex, phthalate-free.
- Unpowdered, minimizes particulate contamination, when products should not be contaminated.
- Medical use according to EN455 (PPE), but not sterile for surgical use.
- Protects against contact with chemicals and chemical splashes for short periods.
- Ambidextrous use.
- Tight fit.
- Length: Size S = approx. 230 mm.
- Color: blue.
- Rolled edge.
- Suitable for food, approved for contact with food.
- CE certified (Europe)
- FDA certified (USA, Canada, Latin America).

3M 1860

- Multi-material composed structure, layer by layer protection, effectively isolate dust, degrade harmful substances and prevent inhalation of ubiquitous pollution in the air.
- Three dimensional protection.
- Comfortable nose clip for perfect fit protection.
- Head strap for comfortable wearing.
- Provide at least 95% filtration efficiency against certain non-oil based particles.
- Suitable for personal daily health protection: these masks are designed to filter smoke, debris, residue and dusts.
- Wide applications across numerous industries and environments.

3M Aura 9332+

- 3M™ Cool Flow™ exhalation valve
- Innovative technology for barely noticeable breathing resistance; Allows respiratory heat and moisture to escape; When exhaling, the sealing points minimise airflow through the top of the mask; Fits perfectly to the shape of the face; Easy positioning of the mask on the face; No slipping; Remains dimensionally stable; Hygienic & practical to take with you.
- High and reliable filtration of particles with less stress on the mask wearer; Reduces fogging of glasses and increases wearing comfort due to low stress on exhalation; Improved compatibility with glasses/eye protection; Ideal fit; Safety due to ideal fit and tight fit; Mask adapts to mouth movement when speaking; Good fit of the mask during use; High wearing comfort; Prevents contamination of the mask before use; Easy storage and distribution
- High wearing comfort
- Ideal fit
- Mask adapts to mouth movement when speaking
- Reduces fogging of goggles and increases wearing comfort due to low exhalation strain
- Safety due to ideal fit and tight fit
- Improved compatibility with glasses / eye protection
- Prevents contamination of the mask before use
- On exhalation, the sealing points of the 9332+ Aura respirator FFP3 NR D with Cool Flow exhalation valve protect up to 30 times the limit value (hygienically individually packaged)
- Remains dimensionally stable

The 3M™ Aura™ respirator 9332+ folding mask enables almost carefree breathing and is extremely comfortable to wear. It owes its comfort plus in particular to the three-part design with the newly developed filter fleece. The advantages of the particle mask start with good visibility: The sealing dots on the top of the mask reduce fogging of glasses - especially in combination with its 3M™ Cool Flow™ exhalation valve. This valve increases wearing comfort, especially in hot and humid environments, as it excellently allows respiratory heat and moisture to escape. The new filter technology also ensures comfortable breathing. It combines the advantages of the 3M™ Electret filter technology with those of the new advanced technology for hardly noticeable breathing resistance with safe filter performance. The average inhalation resistance of 63% is significantly lower than the maximum permissible value of EN 149:2001+A1:2009. Two further advantages of the mask lie in its three-part design: on the one hand, it leads to more comfort and problem-free speaking, and on the other hand, the mask can be folded flat and is thus suitable for practical carrying. The special design of the nose region is also ideal, as it adapts perfectly to the shape of the wearer's face. The chin strap makes it easy to position the mask for a good fit and a secure seal. The 3M™ Aura™ respirator 9332+ is hygienically individually packaged and has a protection level of FFP3 NR D. The limit of use is 30 times the limit value for particles. Its areas of use are in construction, agriculture, quarries, the clay and ceramics industry, iron and steel foundries, the chemical industry, metalworking and processing, the pharmaceutical industry and construction. Approved according to standard EN 149:2001+A1:2009.

3M 8833

- More comfortable to wear on the face, neck and back of the head
- Easy adaptation to the shape of the nose, thus fewer pressure points
- Greater comfort due to optimal adaptation to the shape of the face
- Productivity
- Safe protection due to optimal seal fit
- Safety through the correct protection level
- Prevents the mask from collapsing
- Particularly comfortable to wear
- Flexible, new nose clip design
- High stability
- Durable straps with colour coding for easy identification of protection level
- Effective filtration with low breathing resistance

8833 Respirator FFP3 R D with Cool-Flow exhalation valve up to 30 times the limit value

The 3M™ Respirator 8833 offers a comfortable fit as well as maximum safety. It meets the special requirements (R D) for masks that may be used for more than one shift. Its special features make it a particularly comfortable and powerful particle mask. Its soft, padded inner fleece, for example, makes it comfortable to wear - it also guarantees a secure seal fit even without a foam insert. Its special structure, the waffle pattern on the edge of the mask, also contribute to a comfortable fit as well as safety. In addition, its material is skin-friendly. The particle mask has a coloured, tear-resistant comfort strap. The colour-coded straps make it easy to identify the protection level of the mask (red = protection level FFP3 R D). Another feature is its adjustable M-shaped nose clip: it quickly and easily adapts to the shape of the wearer's nose and prevents unpleasant pressure points. Thanks to its particularly stable basket design, the particle mask has a high degree of stability. A significant factor is the 3M™ Cool Flow™ exhalation valve. It prevents heat and moisture build-up in the mask and makes breathing easier. Comfortable protection is therefore always provided - even in warm, humid environments. Finally, the 3M™ Advanced Electret filter media provides the highest protection with the lowest possible breathing resistance. The 3M™ respirator 8833 has the protection level FFP3 R D. The limit of use is 30 times the limit value for particles. It is used in construction, agriculture, quarries, clay and ceramics, iron and steel foundries, shipbuilding, chemical industry, metalworking and processing, pharmaceutical industry and construction. Approved according to standard EN 149:2001+A1:2009.

3M 8210

Product specification

Brand: 3M
Number of layers: 5 layers
Disposability: Reusable
Model name/number: 8210
Colour: White
Aerosol Type: Non-oil filter
Class: N95
Shelf life: 5 years
Storage temperature: -20 degrees C
Strap material: Thermoplastic elastomer
Nose clip material: Aluminium
Material of the cover sheet: Polyester

Description of the product:

- Approval for use in emergencies by healthcare professionals
- NIOSH-approved for at least 95 per cent filtration efficiency against certain non-oil based particles
- Dual strap design with welded double point attachment provides a secure seal
- Cushioning nose foam
- Lightweight design promotes worker acceptance and can help extend wear time
- Advanced electrostatic media is designed for easy breathing

During the public health emergency of the COVID-19 pandemic, these standard N95 "industrial" respirators may be used by healthcare professionals under the US FDA's Emergency Use Authorisation (EUA). The 3M™ Particulate Mask 8210 is not FDA approved as a surgical mask and is not considered liquid tight, therefore a face shield must be worn during use.

3M™ Particulate Respirator 8210, N95 is a disposable respirator that provides reliable respiratory protection with a filtration efficiency of at least 95 percent against certain non-oil based particles. This respirator is designed for use with particles generated by, for example, grinding, sanding, sweeping, sawing, bagging or other dusty work. This respirator can also help reduce inhalation exposure to certain airborne biological particles (examples: mould, Bacillus anthracis, Mycobacterium tuberculosis), but cannot eliminate the risk of infection, illness or disease. The respirator incorporates technology developed by 3M with advanced electrostatically charged microfibre filter media to facilitate breathing. This respirator is compatible with a variety of protective eyewear and hearing protection.

This particulate mask is NIOSH (National Institute for Occupational Safety and Health) approved for environments containing certain non-oil based particulates and provides a filtration efficiency of at least 95 percent.

Air Queen Nanofiber Filter Breeze Mask (White)

AIR QUEEN NANO Mask White

+ Scented Sterilior to disinfect hands and masks 99.9% against viruses.

• When it comes to quality, performance and breathability, the fibre nanoparticle filter - from AIR QUEEN - offers strong protection with high filtration and ventilation efficiency. It is Lightweight and ergonomically designed for optimal fit and comfort.

• Produced by AIR QUEEN, which specialises in the manufacture of masks:

Using a high quality filter created by the company's innovative technology.

• Internationally recognised for its excellent technical capabilities as a manufacturer of nanotechnology textiles.

• Comfortable 3D design: The nose to neck have been completely covered and efficient inhalation of soft dust has been prevented by the adhesion structure as it shows high stability when worn.

AIR QUEEN MASK:

• Three layers of nano-filter mask for protection. Each layer provides 100% protection against the viruses.

• Strong breathability + High humidity control + Practical and comfortable for the nose + Comfortable nylon ear loops + The masks are made in South Korea.

Honeywell Flatfold Disposable Respirators

NIOSH approved DF300 Series Flatfold Disposable Respirators are made with a multilayered absorption media that repels moisture and features a smooth inner lining for added comfort. Honeywell NIOSH-Approved N95 respirator face masks provide protection against airborne particulates with a 95% filter efficiency against solid and liquid particulates in the air (excluding oils). Each package includes (twenty) disposable N95 respirators.

- Designed to fit all faces comfortably: and accommodate the user's facial movements.
- Multilayered absorption media with a smooth inner lining for added comfort.
- 95% filter efficiency against solid and liquid particulates, excluding oils.
- Latex free woven head straps are welded for a secure fit.
- Concealed: adjustable nose clip and soft foam nose cushion provide a custom secure seal.
- Humidity and moisture resistant filter media that repels moisture for a longer lasting respirator.
- Reliable: durable design that lasts throughout the workday.
- Non-allergenic, latex-free design.
- Packaged to maintain integrity of product in work environment.
- Masks are all bagged into a single open ended plastic sleeve to protect from exposure and contamination when the box is opened.
- This box includes 20 flatfold molded cup face masks.

SourceWeb 3-Ply Protective Disposable Face Mask

Masks are manufactured in an FDA registered facility and are made of non-woven, melt blown fabric. Sold in packs of 200.

These 3-ply masks can help prevent the spread of viruses and are a cost-effective choice for customers and employees who are not in constant contact with people who have contracted viral infections. If you are a first responder or need to protect yourself from viral infections, we recommend purchasing one of our N95 respirators. This soft, multi-layered material is safe for the skin and keeps out fine particles, bacteria and airborne contaminants.

Specific Product Information:

Size: Adult

Factory Registered with FDA: Yes

Certifications: CE (European Union Certification)

Packaging: 200 3-ply masks per box

Manufacturer: Various, available upon request at the time of order.

Product Country of Origin:

Various, available upon request at the time of order.

Legal Note: Wearing this mask will not protect the wearer from airborne particles and droplets, and may prevent others from contracting viruses such as SARS-CoV-2 which causes COVID-19 disease. Due to the health risk and sanitary nature of personal protective equipment, a return policy applies to all health/cleaning/sanitation products we sell.

All sales are final and items cannot be returned. If you have any problems with the products, please contact our customer service team so that we can provide you with excellent customer service and support.

SourceWeb Face masks in modern designs

Our masks are not FFP2 or FFP3 masks, but can protect others by wearing them. The mask is used to reduce the spread of droplets and is not a protection against Covid-19 viruses. It is for your own protection, as by wearing the mask you protect your mouth and nose from unconscious contact.

Babysanft Wet Wipes Ultra Sensitive (52 pieces)

For sensitive baby skin
HiPP Baby Soft Wet Wipes

Discover Babysanft wet wipes Delicately caring and Ultra sensitive - in the extra soft quality with fine fibres. The extra skin-friendly HiPP Babysanft fine fibers provide special softness and are optimal for very gentle cleaning - without linting. The wet wipes are ideal for gently cleaning sensitive baby skin and skin prone to neurodermatitis, because the cleansing lotion contains 99% water and is therefore even more skin-friendly. During diapering and cleaning, the wet wipes protect and soothe sensitive baby skin. In addition, the wipes are free of kerosene oil, fragrance-free, free of essential oils, free of alcohol, soap-free, free of dyes, pH- skin neutral, chlorine-free as well as free of PEG- emulsifiers.

Your advantages at a glance:

- Cleansing lotion with 99% water
- Protects effectively and soothes
- Suitable for the care of skin prone to neurodermatitis
- pH-neutral to the skin
- Free from harmful additives
- Soft fine fibers
- Suitable from the first day of life

SourceWeb Mask cases

In the fight against Covid-19, masks provide protection. Keep disposable and reusable respirators safe from viruses and contamination in the mask box. This keeps things tidy in your pocket or drawer.

SourceWeb Disinfection Station Totem 3 IN 1

Structure in black steel, equipped with a compartment for a dispenser for gel or hydroalcoholic solutions. The non-contact dispensing ensures maximum hygiene for the user, without the need to touch the device with hands. The foot pedal support is supplied pre-assembled, including two stickers, a practical and effective solution for use in stores, offices, schools and healthcare facilities. 1. A4 pin board with sticker 2. Kleenex or PPE compartment. Consumables not included 3. Support adjustable from 190 to 300 mm. Bottle compartment.

SourceWeb Hand Sanitizer

OUR HAND SOURCEWEB SANITIZER INGREDIENTS Nothing Beats the Original Hand Sanitizer

As the inventors of SOURCEWEB® hand sanitizer, we have been leading the world to a new way of keeping hands clean since 2010. Everything we have done and continue to do is rooted in science and innovation.

Our scientists carefully select ingredients that are perfectly balanced to work in harmony. This ensures our hand sanitizers not only kills germs, but also maintain or improve skin health, and deliver an impression that is pleasing to the senses (no one wants a sticky, smelly hand sanitizer) so you can be confident you made the right choice.

The SOURCEWEB PROMISE™

When people see the SOURCEWEB® name, they expect an experience that is safe and effective. That's because every SOURCEWEB® product that leaves our facilities is manufactured according to strict FDA safety and regulatory standards, and using only high-quality ingredients, and has passed rigorous testing. That's our promise to you.

Even during unprecedented demand, the SOURCEWEB brand stayed true to our promise, committing to the standards you have come to trust. The FDA has issued warnings about hundreds of hand sanitizers with ingredients of concern or contamination* and is rolling back temporary emergency guidance that loosened manufacturing rules – and through it all the SOURCEWEB brand continues to deliver safe options for families and businesses everywhere.

70% Ethyl Alcohol

The Centers for Disease Control and Prevention recommends using an alcohol-based hand sanitizer that contains at least 60% alcohol when soap and water are not available. We've exceeded those requirements to offer better efficacy – our products work harder to kill the most germs. The active ingredient in our hand sanitizers is 70% ethyl alcohol which kills 99.99% of germs that may cause illness. We source from suppliers who offer ethyl alcohol at the high quality necessary for over-the-counter drug products. Most of the ethyl alcohol used in our SOURCEWEB® products is plant derived.

An Optimal Experience

If active ingredients were all it took to make hand sanitizer, we could just rub ethyl alcohol on our hands and call it a day. But the SOURCEWEB® brand knows it's not enough to just get rid of germs – we also have to take care of hands. That's where our carefully selected inactive ingredients come in to play. Research shows the effectiveness of non-alcohol hand sanitizer varieties can be negatively impacted by the addition of ingredients like fragrances and skin conditioners.^{5,6} But alcohol-based formulations, like SOURCEWEB® hand sanitizers, are less sensitive to such additions. Our inactive ingredients complement the ethyl alcohol base to ensure an optimal, balanced experience that maintains effectiveness.

Hotgen® Antigen Self Test

Officially recognized in the EU as a lay test (with CE seal).

This rapid, single-use test is used for the determination of coronavirus antigen. The sample is taken from a human nasal swab. The Corona Rapid Test is used as a rapid test for suspected coronavirus cases. This test can also be used for reconfirmation for nucleic acid detection in discharged patients. This test has CE approval for lay use (self-testing) for the detection of SARS-CoV-2 and is also listed with the BfArM, as well as evaluated by the Paul Ehrlich Institute.

Features:

- Fast result - 15-20 minutes
- Easy to use even by laypersons - all in one kit
- Hygienically individually packaged test kits
- High accuracy and variant tested (including Omicron)
- Test with CE certification as a lay test

Scope of delivery:

- Coronavirus antigen test cassette
- Sample extraction buffer
- Sterile swab
- Disposable pressure bag for disposal
- Instructions for use

Manufacturer: Beijing Hotgen Biotech Co, Ltd.

Instrument: Can be performed without any other equipment

Format: Anterior nasal test

Storage temperature: 4 - 30°C

Selection time: 15 minutes

Specificity: 99,76 %

Sensitivity: 97,10%

CE Certification: CE 0123

BfArM-AT number: AT1236/21

Packaging: individually packaged

CE-Certificate

Variant Verification (Omicron)

SafeCare Antigen Self Test

The SafeCare COVID-19 Nasopharyngeal Antigen Rapid Test is designed to provide high-quality detection of nucleocapsid protein antigens. To do this, a qualified swab is taken from the nasopharynx or anterior nasal region as part of a professional testing strategy. The antigen rapid test has been evaluated according to the Paul Ehrlich Institute and is included on the BfArM list for SARS-CoV-2 tests. It may only be performed by medically qualified personnel. Testing by trained personnel is also possible at the PoC.

Manufacturer SafeCare brings the COVID-19 Nasopharyngeal Antigen Rapid Test, a reliable and simple option to implement effective testing for the novel coronavirus. Since mass testing is also possible, a sustainable testing strategy can be implemented for public facilities or commercially used areas as well as schools and companies in order to quickly locate people infected with SARS-CoV-2 and thus protect all persons concerned.

A test result is available within 10 to 15. Thus, those tested have rapid certainty, with the relative sensitivity of the SafeCare - COVID-19 Nasopharyngeal Antigen Rapid Test The relative specificity is 96.97% and the relative specificity is 100%.

Specimen Material: nasopharyngeal swabs.

Test result: in 10 to 15 minutes

Very high sensitivity: 96.97%

Very high specificity: 100.00%

Contents : 25 tests incl. consumables

Handling: Easy handling without additional analysis system

Test location: Test possibility where no laboratory test is available (PoC)

Use: Test intended for professional use

Reimbursable: BfArM-listed (AT199/20) and therefore reimbursable.

The indicated prices are unit prices per 1 test

Website Development

The website is a showcase for the world and thus contributes significantly to the image and success of the company.

SourceWeb Informatics AG creates unique web designs, perfectly matched to the corporate design and needs of your company. At SourceWeb, web design means a design that adapts to current trends while still respecting classic principles - always taking into account the user experience. From the very first moment, the web designers focus on the client's wishes and provide advice at the highest level. In web design many aspects are crucial for success.

The user experience is the top priority

Therefore, every decision within the design process also focuses on the user, because it is for them that the website is ultimately created. The better the user experience and easier the ordering process or contact, the more positive it will be for your sales. Intelligent web design lets the visitor immediately see what it's all about, answers any questions they may have, and still arouses curiosity.

Webshop development

We know the special challenges in e-commerce. With the aim of optimizing processes, we accompany your digitization process and develop the ideal digital solution for your business model.

In doing so, it is important to us to plan user-friendly ordering processes with you, incorporate complex customer data and individual pricing, and thereby increase customer satisfaction and efficiency in online sales.

Web applications

More and more often, companies decide not to run their applications in and outside of their company as desktop applications (also: rich client applications), but to implement them as web applications.

In addition to classic websites such as company presences, news portals, etc., we are now also implementing more and more complex office or specialist applications in a web front-end back-end architecture.

The reasons for this are the steadily increasing availability and quality of Internet connections on the one hand, and the comparatively high performance of browsers, as well as the technically almost unlimited computing capacity of servers in data centers on the other. Since the complex calculations for this type of application take place directly in the data center and not on the user's PC, even the most complex applications can be run on weak end devices and even simple smartphones.

Just contact us, we will be happy to analyze your requirements and provide you with a non-binding offer!

Application software

We develop computer software of any kind, tailored to your needs!

Our company has more than 15 years of project experience in the field of individual software development on the international market. Our experienced staff has already delivered numerous top quality projects and can promptly analyze your request and offer you the best possible software solution. We work on the basis of agile software development methods. We react promptly to change requests, offer our customers full transparency, consultation and always a possibility to check the status of the project and discuss new requests.

Just contact us and we will analyze your requirements and provide you with a non-binding offer!

App Development

We create an app concept together with you and increase the chances of success. Benefit from our experience from previous projects. Our experts for the Apple iOS and Google Android platforms program your app and implement your concept. We speak Objective-C and Java fluently and ensure that your concept is solidly implemented. Even after project completion, we are always at your disposal.

We are looking forward to your request!

Cloud Software

Cloud software offers some significant advantages over locally installed programs.

The application has virtually unlimited computing capacity and storage available, regardless of the end device, and you only pay the data center for the resources your company actually uses.

If we develop your cloud applications according to the "serverless principle", you also do not need system administrators. There is simply no need for dedicated servers in data centers, which would have to be administered.

Instead, the application fetches the operating system, databases, storage and Internet connection directly from the cloud - and always the latest version and the resources that are needed right now.

Contact us, we will be happy to analyze your requirements and provide you with a non-binding offer!

Cloud Administration

Bring your business to the cloud with us!

Cloud computing has revolutionized how businesses use IT. The use of cloud computing leads to greater flexibility, as the required IT infrastructure is available immediately and can be scaled at any time as needed.

We configure and manage your private and public clouds using the latest virtualization technologies.

Simply contact us. We will be happy to advise you!

Server administration

We set up and administer your company's servers. Likewise, you can use our managed servers for various services such as web hosting and Big Data. Our system administrators will be happy to advise you.

Contact us and we will be happy to analyze your requirements!

Client Administration

We administer the client PCs in your company, install software and configure your devices.

We fix the problems you have with the computers, regardless of whether they are software or hardware problems.

Whether Windows, Mac or Linux systems, we have the right expert for every problem!

Just contact us. We will be happy to advise you!

SMM

Social media marketing

Promote your social media content with our help! This will help you get new customers through your social media channels and build a better bond with your existing customers!

Contact us, we will be happy to answer your questions!

SEO

Search Engine Optimization

Secure the best positions in search engines with our expertise and with the help of a unique method developed by us!

Contact us, we will be happy to answer your questions!

Advertising

Advertising and market communication

Turn to us for marketing and customer acquisition of all kinds! We help you in all related areas, from general online marketing such as search engine marketing, social media marketing and search engine optimization to the design of advertising materials.

Draft contracts

SUITABLE CONTRACTS ARE THE BE-ALL AND END-ALL

We determine your requirements and then draw up tailor-made contracts for your company. You will not get any off-the-peg contracts from us, but only contracts that are precisely tailored to your needs.

Contact us, we will be happy to advise you!

Terms and conditions

If you conclude contracts on the Internet, for example by operating an online shop or making reservations/bookings, correct terms and conditions are extremely important.

We would be happy to draw up your general terms and conditions tailored to your needs.

Just contact us, we will be happy to advise you!

Foreclosure

SEIZURE

If you have an enforceable title, whether you have obtained it by order for payment or by legal action at court, it is possible to initiate the foreclosure by court or bailiff.

If the foreclosure is successful, the debt amount will then be paid to you.

Contact us, we will be happy to advise you!

Legal action

If the debtor does not agree and does not pay voluntarily, or even opposes the court order, the sum must be claimed in court.

In the case of a positive judgement, an enforceable title is obtained, so that one can proceed to the seizure with the legal force of the judgement.

Contact us, we will be happy to advise you!

Court order for payment

Depending on the situation, the country and the assessment in relation to the debtor, a court order for payment can be a quick means of obtaining an enforceable title.

If the court order for payment is successful, attachment can then be sought from the debtor.

Just contact us, we will be happy to advise you!

Debtor Negotiation

We are happy to enter into negotiations with the debtor and in the course of this negotiate instalment payments and settlements that satisfy both sides.

This can often avoid a court case.

Contact us, we will be happy to advise you!

Receivables reminder

In a first step we remind the debtor to pay. This is usually done both electronically and in writing by post.

In this way we want to persuade the debtor to pay voluntarily, as a court case is associated with very high costs for the creditor in the first instance and for the debtor in the second.

We would be pleased to advise you on this subject. We look forward to hearing from you!

Trademark monitoring

We continuously monitor your trademark in trademark registers and inform you about trademark applications that could be confused with your trademark.

If new trademarks are filed by third parties that potential customers might confuse with your trademark, it is advisable to react during the 3-month opposition period. In order not to miss this deadline, it is necessary to continuously monitor the trademark registers for new applications.

Just contact us, we will be happy to advise you!

Patent application

Protect your inventions. This will prevent them from being copied and imitated by your competitors.

Just contact us, we will be happy to advise you!

Design protection

REGISTERED DESIGN

Protect the distinctive look of your product. This will ensure that no competitors sell similar products to enrich themselves at your expense.

Just contact us, we will be happy to advise you!

Trademark application

Protect your brand and your reputation! The brand is the capital of your company. Only if you protect your brand accordingly, you can successfully protect yourself against imitators and free riders!

Contact us, we will be happy to advise you!

Litigation Funding

LEGAL COSTS ARE EXPENSIVE

The expenses for the court and for your own lawyer have to be advanced in a court case.

We take over these costs for you and, in case of success, receive a share of the amount claimed.

Contact us, we will be happy to advise you!

Tax optimization

Almost all businesses are run with the wrong company structure from a tax perspective.

Do not throw more money at the state than is absolutely necessary. We can help you set up your company with the right legal structure.

There is no one country that is optimal for every start-up. Often a company structure even has to be set up across several countries in order to benefit from certain advantages (e.g. parent-subsidiary privilege, double taxation treaties, nesting privilege, ...).

We incorporate companies in numerous countries worldwide, most notably in the UK, Ireland, Switzerland, and the USA.

Contact us, we will be happy to advise you!

Escrow Services

The basic problem is simple. The buyer doesn't trust the seller to deliver. The seller doesn't trust the buyer to pay.

Therefore, one of our partner law firms takes the money and pays the seller only after the seller can prove beyond a reasonable doubt that he has delivered.

Contact us, we will be happy to advise you!

10, 50, 100 coffee capsules Gusto Dolce

It is the perfect blend of 50 rabica and 50% robusta quality.

The taste, not too sweet, is full and round.
 One package contains 10, 50, 100 coffee capsules
 (compatible with Nespresso machines).

PRODUCT DETAILS	
Quantity	10 or 50 or 100 coffee capsules per pack
Weight	(10 capsules) 0.109 kg (50 capsules) 0.545 kg (100 capsules) 1.015 kg
Size	(10 capsules) 15 x 6.5 x 3.5 cm (50 capsules) 16 x 16 x 8 cm (100 capsules) 19 x 16 x 8 cm

10, 50, 100 coffee capsules Gusto Forte

It consists of 100% Robusta quality, which is more bitter and woody taste and contains twice as much caffeine than Arabica.

One package contains 10, 50, 100 coffee capsules (compatible with Nespresso machines).

10, 50, 100 coffee capsules Gusto Decaffeinato

Decaffeinated blend

It used to be thought that decaffeinated coffee contained inferior blends or had a different taste than caffeinated coffee, but now we know that this is not the case.

Even in a decaffeinated blend, you can recognize the quality. Even in a decaffeinated blend, you can recognize the quality of a good coffee. This provides an authentic and creamy taste, but has a caffeine content of over 0.10%.

One package contains 10, 50, 100 coffee capsules (compatible with Nespresso machines).

Linea BAR Premium

The higher the rating, the more evenly roasted the bean, the more balanced the coffee flavor.

A blend of different coffees from South America and Africa with some cocoa flavor. The intense roasted notes accompany you to the last drop. Premium has a smooth roasted profile with low acidity and delicious cocoa notes.

Lightly roasted Arabicas and a touch of Robusta are blended into Premium coffee.

Origin
Brazil, Uganda and Colombia

PRODUCT DETAILS	
Weight	1 kg
Size	38.5 x 14 x 7 cm

Linea BAR Suprema

It has an extremely light roast profile with a slightly bitter taste and barely perceptible acidity.

And when you add milk, it reveals a delicate aroma with notes of almond and honey.

Linea BAR Suprema is made of 90 arabica and 10% robusta. It is the perfect combination!

Generally, however, most prefer a finer, less full-bodied and creamy arabica coffee.

The ideal blend for your classic crema coffee or espresso.
